

A close-up, low-angle shot of the front of a DAF truck. The image focuses on the silver-colored front grille and bumper area. The word "DAF" is prominently displayed in a large, bold, dark blue font with a metallic outline. Above the grille, a blue section of the truck's body is visible. To the right, a portion of a blue headlight is seen. The background is a plain, light blue sky.

TraXon

A TraXon é o novo modelo de transmissão aplicado nos veículos DAF, em substituição a AS Tronic.

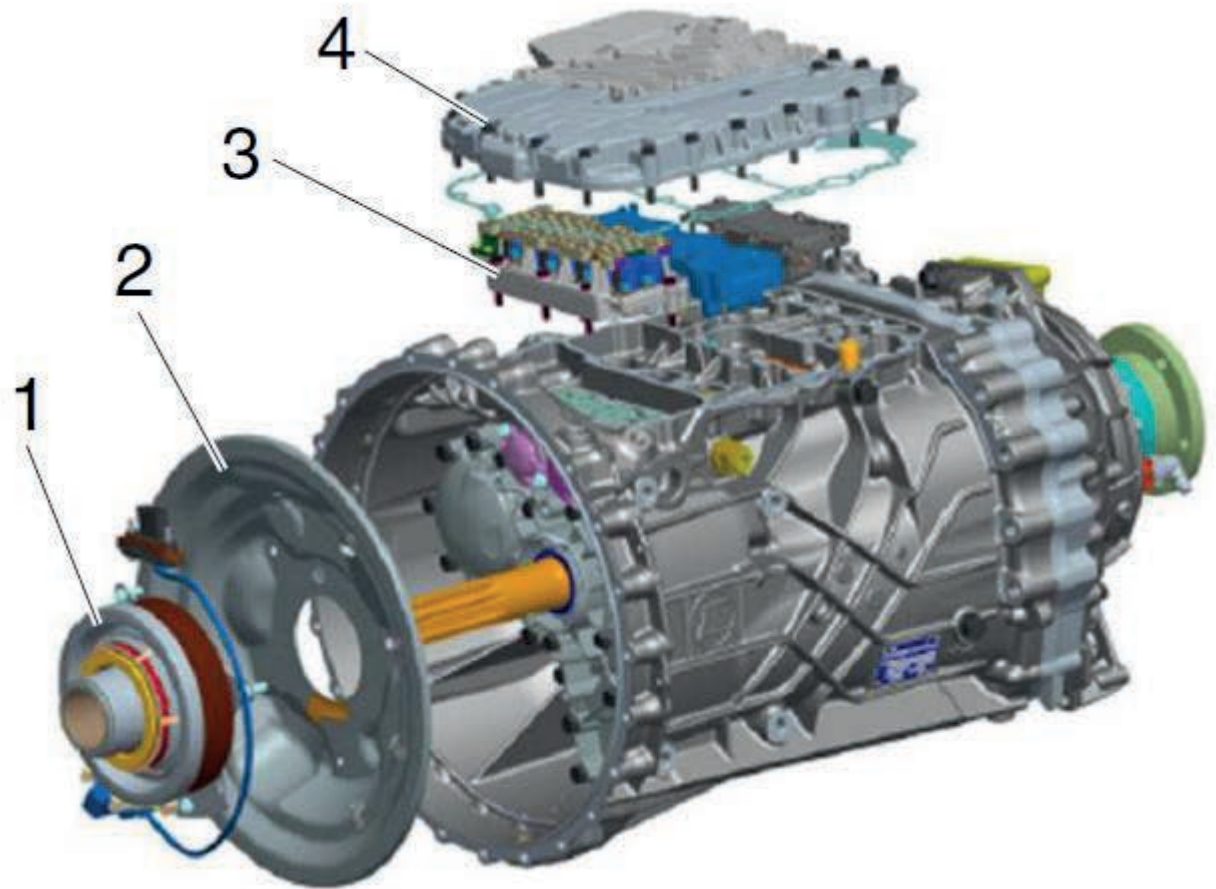

TraXon

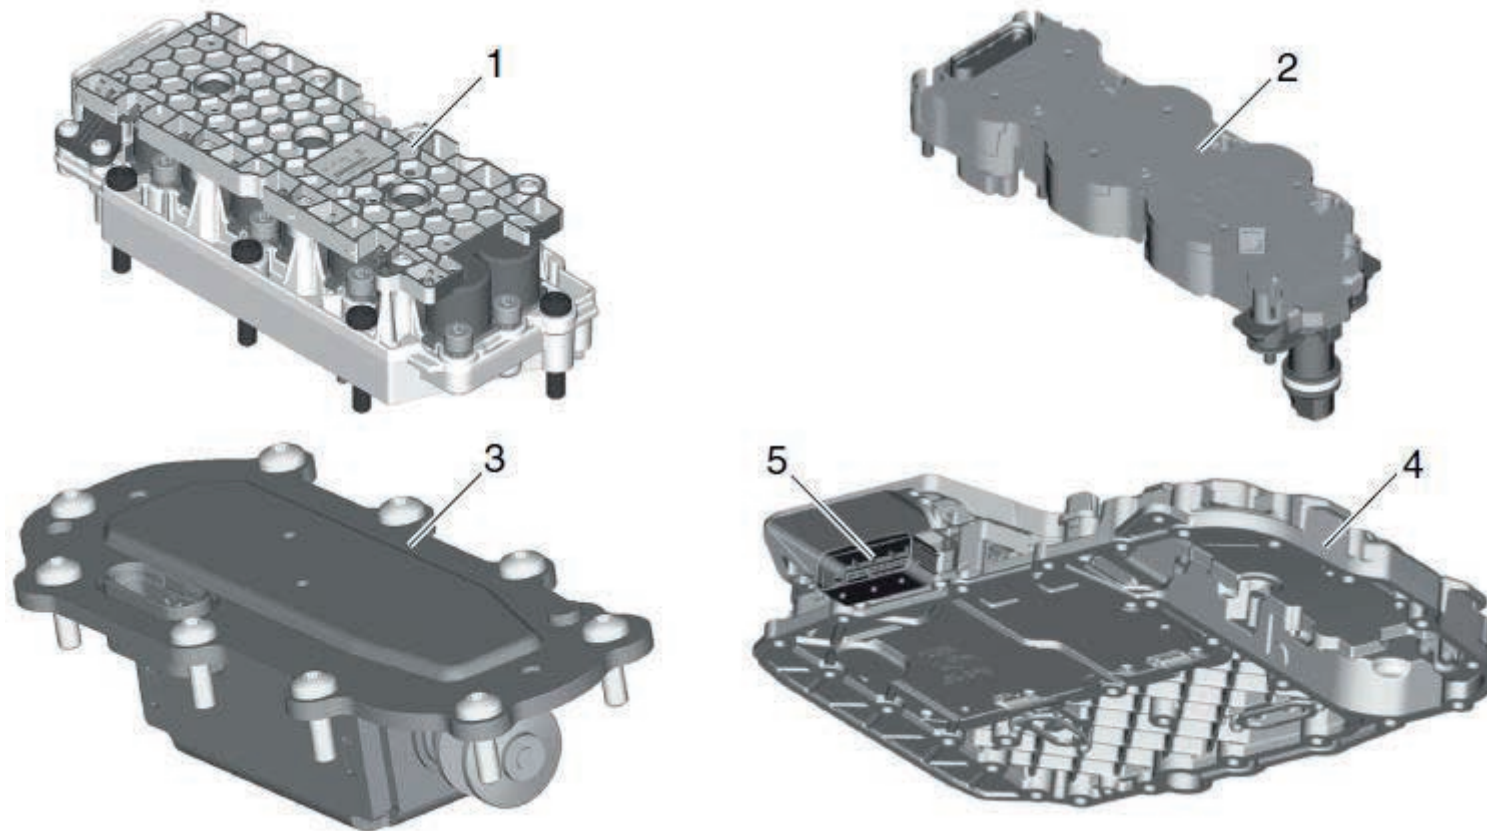

TraXon

- 1 acionador da embraiagem
- 2 Placa de proteção contra pó
- 3 Conjunto de componentes modulares
- 4 ECU da TraXon

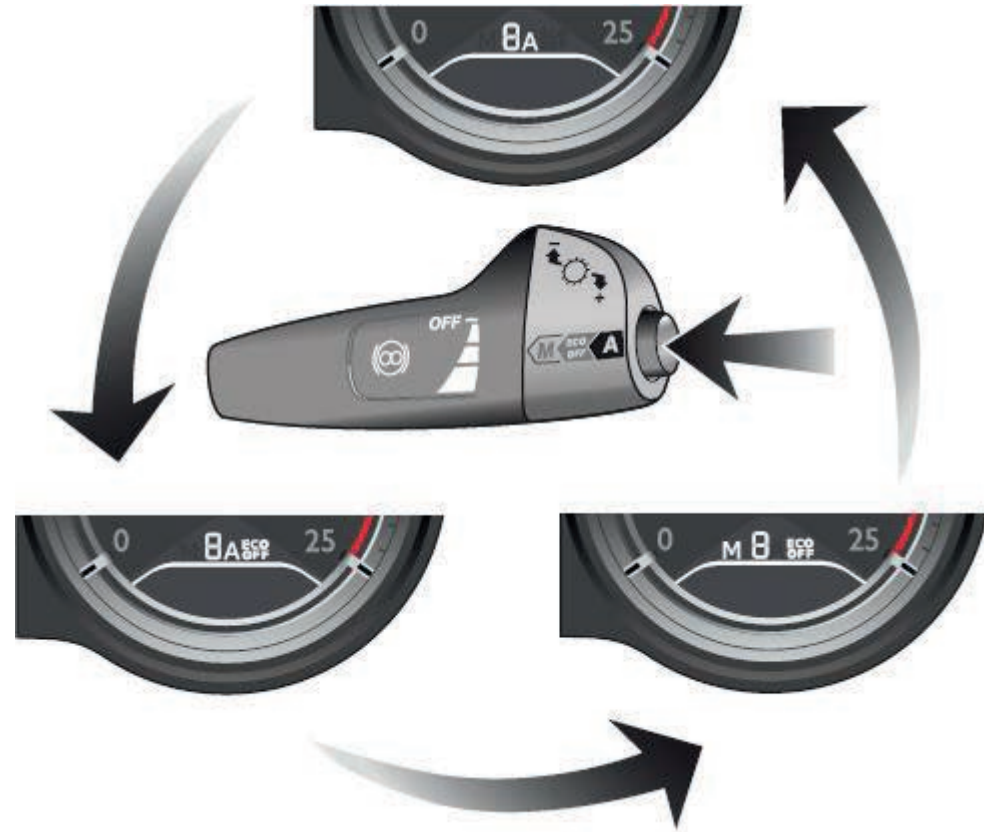

TraXon – Modulador

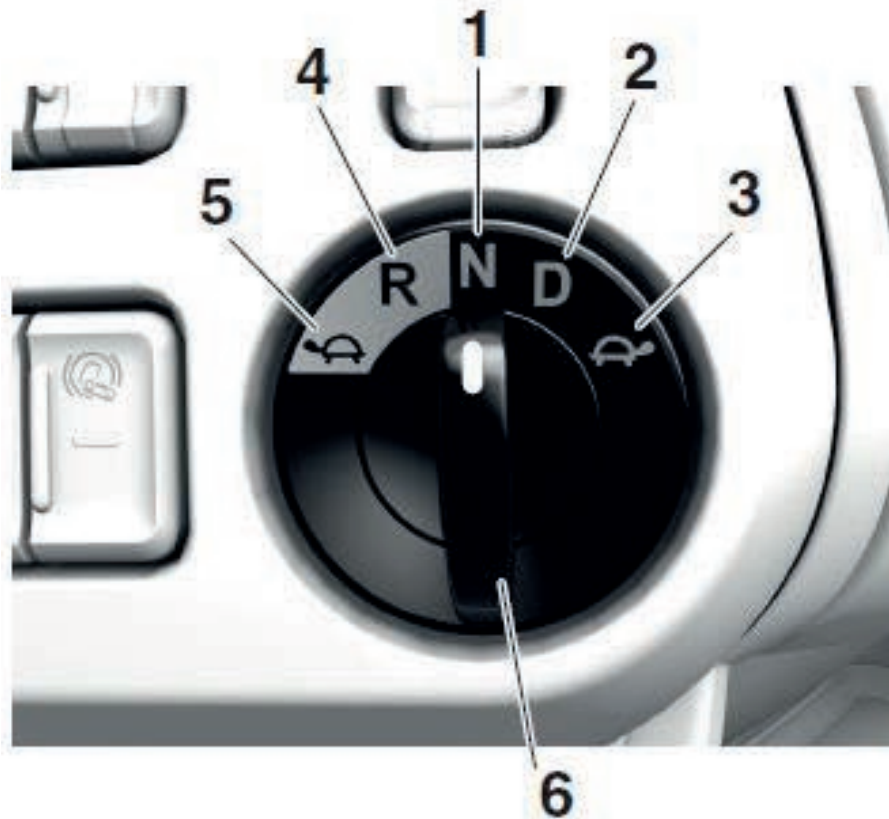

- 1 bloco de válvulas
- 2 módulo do sensor
- 3 Seletor da porta
- 4 ECU da TraXon
- 5 Conector principal

TraXon – Comandos da Coluna de Direção

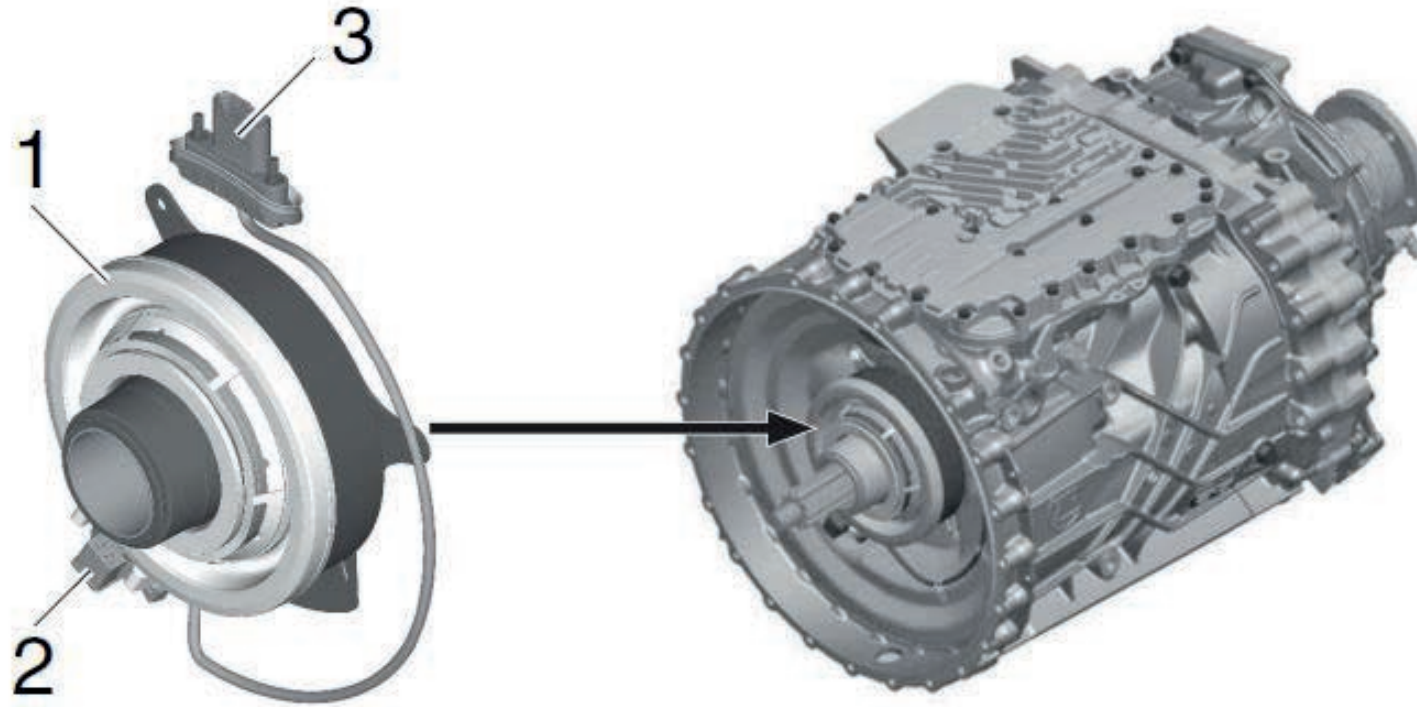

TraXon – Seletor do Modo de Condução

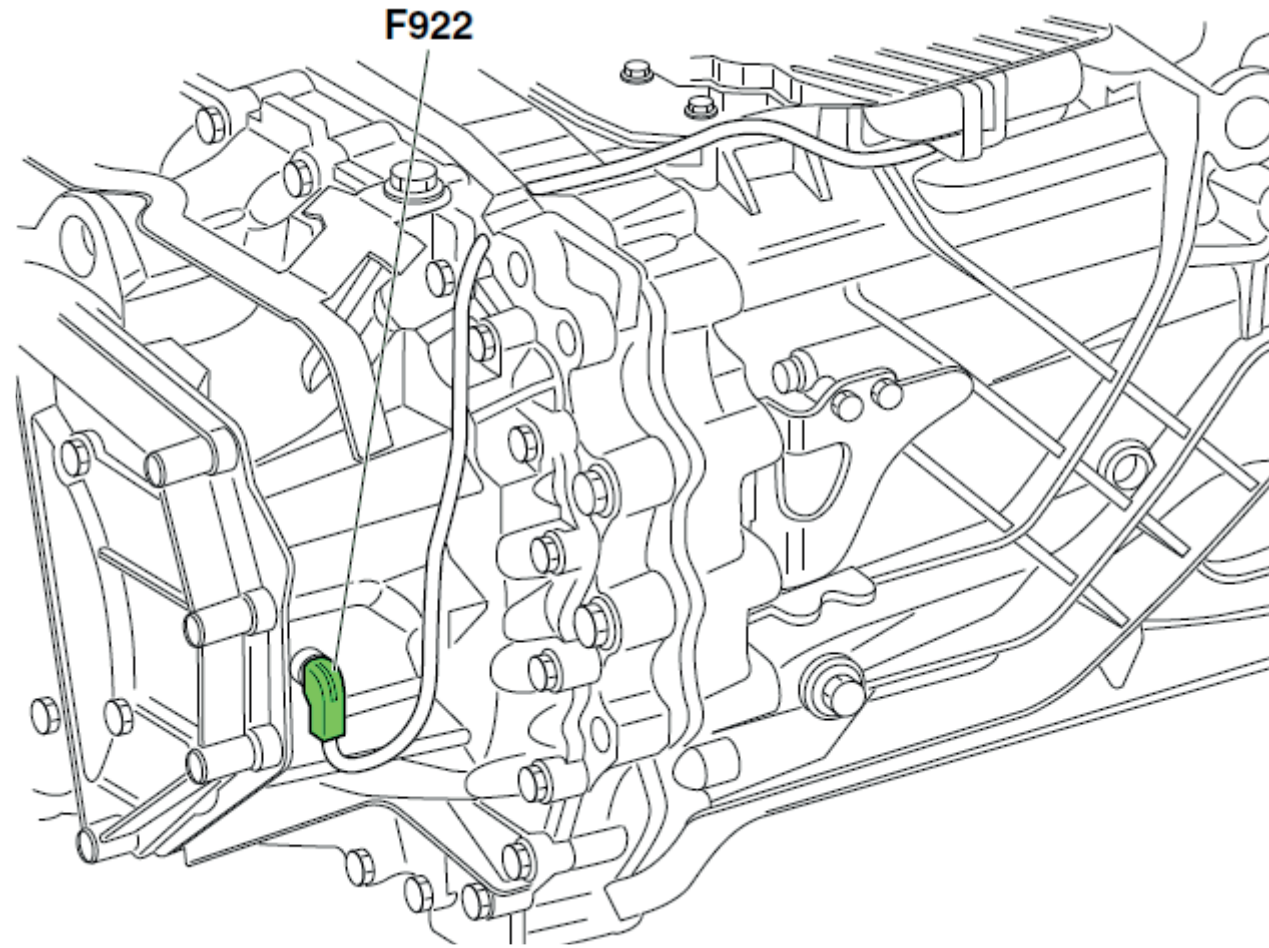

1: Posição de ponto-morto
2: Posição normal de arranque para a frente
3: Posição de manobra para a frente
4: Posição normal de arranque em marcha-atrás
5: Posição de manobra para trás

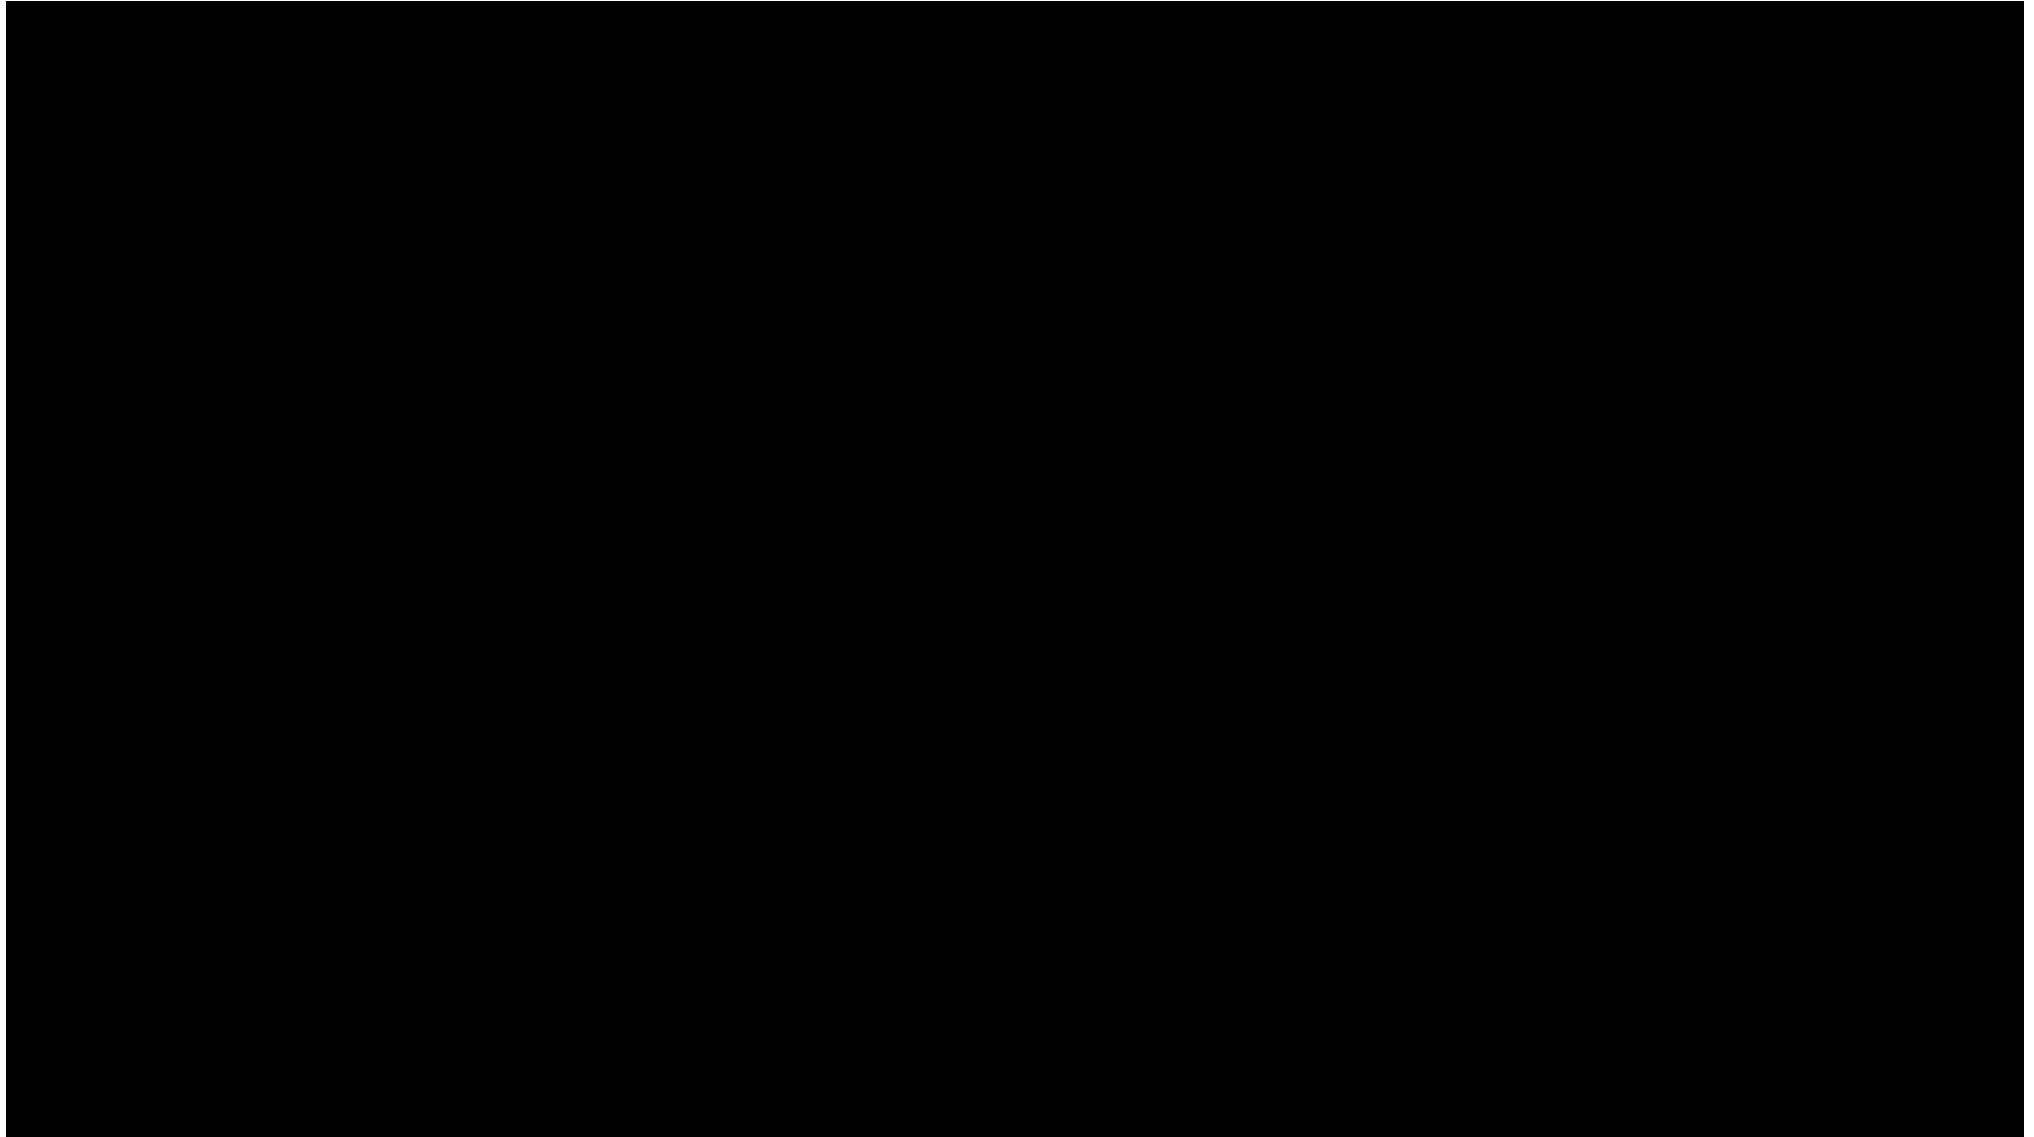

TraXon – Atuador de Embreagem (CONACT)

TraXon – Sensor de Velocidade do Eixo de Saída

TraXon – Modo Eco

TraXon – Eco Roll

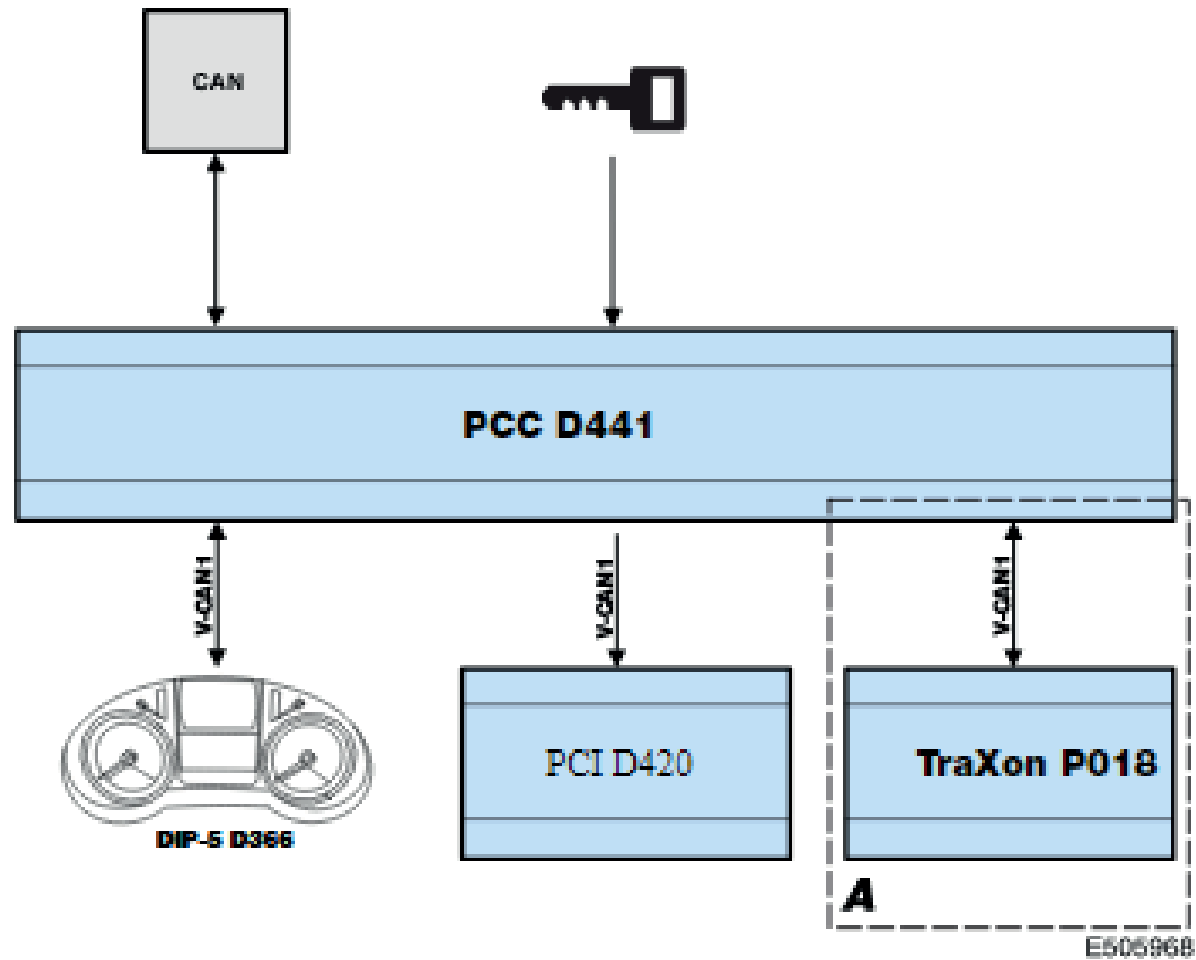

- Um veículo com a funcionalidade EcoRoll troca a marcha da transmissão para neutro (se as condições permitirem).
- Isso permite ao veículo descer (marcha desengatada) em declive sem o desempenho de frenagem do motor.
- Não reduzir a velocidade do veículo (por arrasto do motor) resulta em melhor uso da energia cinética.
